

Volcano Eruption!

The students will be paired into groups of two. They are to create small lifelike models of the three different types of volcanoes. The volcanoes should be active, there should also be noticeable differences amongst the three types. Students will have to be able to talk about how the volcanoes are alike, and how they differ from each other. They will have ten minutes to present this to the class.

	3 Above expectations	2 Meets expectations	1 Fair	0 Not Attempted
Volcano presentation (Volcano works, and resembles an active volcano)				
Volcano explanation of the 3 types(How they differ, and how they are alike)				
Shows the consequences of an active Volcano (City located below)				
Interesting Facts (How many volcanoes are there in the world, how many can erupt at once, which is the world's highest volcano? ETC..... Students need 3 interesting facts mixed in their presentation.
