Annotated Bibliography

"For Educators - NASA Science." *For Educators - NASA Science*. Web. 07 Feb. 2016.

This website has many useful tools, its purpose is to excite the teachers, and also students about space and the research being done about it. I could use this in many different ways. There are videos and examples of the work NASA is doing right now in space. I would use this more as a starting point for my students to jump into it from here.

"Lesson Plan." *Earth Science S*. Web. 07 Feb. 2016.

This website is awesome. It already has lesson plans laid out and formatted for you. It is very nice because it has some higher level thinking, and also some lesson plans for lower levels such as K-2. There are many web tutorials.

"Physical Science: Session 1." *Physical Science*. Web. 07 Feb. 2016.

This website is very useful for teachers who are looking for ready made lesson plans. They have many to lesson plans to choose from, and they are laid out nicely starting with grade, then to topic. If a teacher was looking for a lesson plan with specific terms or vocabulary words, this website would be an awesome place to look.

"Resource: Essential Science for Teachers: Life Science." *Resource: Essential Science for Teachers: Life Science*. Web. 07 Feb. 2016.

This website has many different tools and features that are useful. It has ready made lesson plans, while it also has many videos and other informational texts. This website could also possibly be used for a webquest for teachers who are teaching life science.

This website may appeal to students who like interactive lessons.

"Economic Problems Facing the U.S. | Economy In Crisis." *Economy In Crisis* RSS. Web. 08 Feb. 2016.

This website is more of an informational tool more than anything. It informs the reader about the issues that are currently plaguing our nation. It also then has the option to read what some possible solutions to our problems are. It looks like it also works as a search engine, it has many different tools you can select to narrow down the topics you may be looking for.

"Famous Male Scientists." *Ranker*. Web. 08 Feb. 2016.

This website is informational for the students. The first page ranks the most notable male scientists, it gives the basic information about the person such as important works and what they contributed to society. Every scientist has a link that you can click on to further learn deeper about the person. This is a really cool site, it has a cool layout that makes a timeline of the famous scientists.

"Life Science." *Essential Science for Teachers*:. Web. 08 Feb. 2016.

This website serves as a dual purpose website, teachers can obtain lesson plans , while students can log on and do interactive activities that are fun, but yet engaging. It also serves as a place for teachers or students to go and get the most recent news that pertains to the subjects you may be looking for.

"More Resources." *Global Environment: Considering U.S. Policy*. Web. 08 Feb. 2016.

This website is all information, from what I have seen it doesnt look to have many interactive activities or anything of that sort. Some students may become stale with this website unless they are using it for specific research items.

"Physical Science Teaching Resources & Lesson Plans | Teachers Pay Teachers."

Physical Science Teaching Resources & Lesson Plans | Teachers Pay Teachers.

Web. 08 Feb. 2016.

This website is the best for teachers, not only does it have ready made lesson plans, but it also has other great ideas that you can pay small amounts for. You can even sell your own lesson plan on there. The lessons range from informational, to interactive. This website is very useful for any teacher who could be looking for ideas to get their students engaged and excited about a certain topic.

"Ten Historic Female Scientists You Should Know." *Smithsonian*. Web. 08 Feb. 2016.

This website serves more as an informational hub to visit, instead of a fun or active website. Right away it is viewed almost as a timeline of famous female scientists, with their achievements, and also some basic information about them. This website could be used for students who are just scratching the surface of the famous women.
