To whom it may concern:

It is with great confidence that I write this letter of recommendation for Noah Battenfeld. Over the past 2 years, I have had the privilege to mentor and work in partnership with Noah on and off as a part of his education program at Bethany Lutheran College. Noah has worked with a diverse group of students in my kindergarten classes at Washington Elementary school.

As a field experience candidate, Noah was responsible for assisting me with various activities, working with small groups of students in math and reading, and completing his course work provided by the college. After his field experience, Noah took the initiative and reached out several times to help in my classroom. He tutored some of my students through the America Reads and Counts program. In addition, he helped with Kindergarten Round-up. Noah quickly gained respect from the other staff, students and parents at Washington Elementary through his strong work ethic, positive attitude and enthusiasm that he brought to school each day. He continually demonstrated patience, flexibility, and commitment to the students, by helping the children grow in their development in a safe and caring environment. The students always looked forward to seeing Noah each day.

I highly recommend Noah for the available teaching position. I know whatever Noah decides to do in the future he will do an outstanding job and prove to be an asset to any school district. Please feel free to contact me if you require any further information.

Sincerely,

Abby Brady
